ORGANIC PEAT SOIL PRODUCTS

Early Rise soil is an all purpose, organic, non-sterilized and naturally decomposed sphagnum peat soil with no additives. It can be used to enhance/lighten lower grade soils such as Loamy, clay-like and sandy soils. Sphagnum peat acts a sponge, it's loaded with fibres that store water and vital nutrients, releasing them as needed. Peat can be used to disperse any added nutrients, hold 20 times its weight in moisture and acts as a time release for watering as well. The Peat in our soil will also prevent that crusty surface layer that can deter moisture retention.

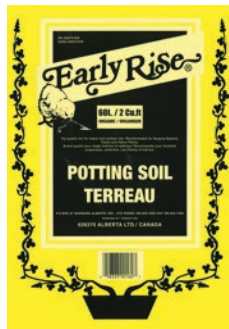

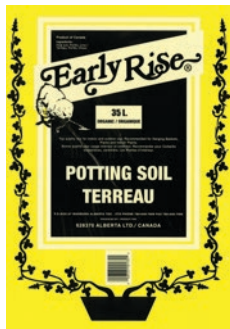

Recommended uses: All trees, plants, shrubs, vegetables, flowers and topsoil.

QUANTITIES

60L/2 Cu. Ft. Bag (60 Bags/Pallet)

REG

@ \$6.90 / Bag

ORGANIC POT SOIL PRODUCTS

Early Rise Potting Soil -All the benefits of our peat soil and more by adding perlite. Perlite has a porous property that will increase water retention, drainage and provide necessary aeration for healthy root systems in plants. Perlite neutralizes acidity and acts as an insulator, protecting the plants from temperature changes (handy in Alberta!).

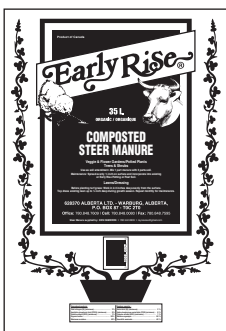

Recommended uses: All trees, plants, shrubs, vegetables, flowers and topsoil.

QUANTITIES

60L/2 Cu. Ft. Bag (60 Bags/Pallet)
 35L/1.25 Cu. ft. Bag (84 Bags/Pallet)

COMPOSTED STEER MANURE

Nutrient rich sheep manure is a natural slow-release fertilizer. High in phosphorous, nitrogen and essential micro-nutrients for optimal plant growth. Sheep manure defends against pests and is low odor. Incorporate with sphagnum peat to feed plants with a continuous supply of micro-nutrients.

QUANTITIES

35L/1.25 Cu. ft. Bag (70 Bags/Pallet)

REG

@ \$5.50 / Bag

Recommended uses:

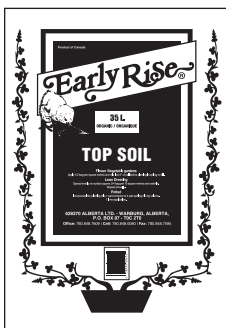

Veggie & Flower Gardens/Potted Plants Trees & Shrubs

Use as soil amendment. Mix 1 part manure with 3 parts soil.

Maintenance: Spread evenly ½ inch on surface and incorporate into existing or Early Rise Potting or Peat Soil.

Lawns/Dressing

Before planting turf grass: Work in 2-3 inches deep evenly from the surface. Top dress existing lawn up to ¼ inch deep during growth season. Repeat monthly for maintenance.

TOP SOIL

Flower/Vegetable Gardens

Apply 1/2 bag per square metre and mix into 6" of soil before planting in spring or fall.

Lawn Dressing

Spread evenly on surface approx 3/4 bag per 10 square metres and water in. Repeat annually.

Potted

Incorporate into planting mix, 1 part compost to 4 part potting mix by volume. 1 time application.
